

MirageTek Globl Resources Limited was first established in 1998 and has two arms to the Company. Procurement and Recruitment for the IT world!

Procurement is quite a broad term, but we at MirageTek do not limit ourselves to just Software or Hardware, Corporate or SME, Server or Client. We can offer **great pricing and honest lead times** on all IT kit that maybe required helping develop a Company's infrastructure.

Our business partnerships with companies like IBM, CISCO, Hewlett Packard, TOSHIBA, Intel, Sony, NEC, Compaq etc coupled with our buying power, enables us to **provide you with reliable products and services** in a very timely and cost effective manner.

MirageTek is also a leading provider of global human capital solutions. We deliver a broad service portfolio including contract and permanent recruitment and workforce management services, to a global client base.

We know our future is based on the quality of our people and our offering. We aren't prescriptive in our approach we don't believe in off-the-shelf solutions.

We provide a service specifically designed to meet client needs.

“Our solutions are not limited to the products and services available through our partners. We are committed to providing the best solution, and will research other options to ensure this.”

MirageTek offers a range of services spanning from needs analysis and design through post implementation support and maintenance. Your unique requirements determine which of our services are part of your custom solution. **Whatever your needs** - for system or network components, complete solutions from design through on going support and maintenance, or a partial solution that falls somewhere in between, **give us a call.**

DESIGN

The design of complete systems, upgrades, or partial systems is the first step in meeting many customers' needs. We identify needs and requirements, and then design a cost effective solution to meet them.

PROCUREMENT

Strategic prtnerships with leading hardware and software vendors provide us with access to huge inventories of product. This results in the timely delivery of products, at competitive prices.

IMPLEMENTATION

Our trained staff has years of experience installing and testing systems, networks and selected components. Implementation is planned to minimize disruption and to provide as smooth a transition as is possible.

PERMANENT / CONTRACT SERVICES

The fact that MirageTek has equal ability to deliver Permanent and Contract services puts it in a unique position amongst the major I.T. recruitment organizations.

MirageTek is able to offer its' clients either, or both types of service, on an unbiased basis, uninfluenced by its own commercial agenda.
